PROFESSIONAL SUMMARY

Results-driven Software Engineer with 7+ years of experience building scalable web and mobile applications. Proven expertise in CI/CD pipeline design and automation, AWS cloud services (S3), and full-stack development with JavaScript, TypeScript, React Native, and Ruby on Rails. Experienced in leading engineering teams, managing App Store and Google Play release cycles, and delivering user-centric products in agile environments.

SKILLS

Languages & Frameworks: JavaScript (ReactJS, React Native, Node.js, Vue.js), TypeScript, Ruby on Rails, HTML, CSS, TailwindCSS
CI/CD: GitHub Actions, CircleCI, App Store & Google Play deployment
Cloud & Infrastructure: AWS S3 (multi-environment configuration, image/file storage), Firebase Cloud Messaging
Databases: PostgreSQL, MySQL, Redis (OTP & token caching)
Tools & Platforms: JIRA, Git, Postman, Storybook, Sanity CMS, Typesense, JWT, Passport.js, Rails Hotwire Stimulus
Methodologies: Agile/SCRUM, RESTful API design, system architecture design, code review & mentoring

WORK EXPERIENCE

Software Engineer
Fetchly Labs

Mar 2023-Present
Remote

- Engineered a cross-platform **React Native** mobile application from scratch for iOS and Android, applying user-centric design principles and owning the full **CI/CD release** lifecycle including versioning, builds, testing, and **App Store / Google Play** submissions.
- Designed and managed CI/CD pipelines for mobile and admin codebases using **GitHub Actions**, automating build, test, and release workflows to ensure consistent, reliable, and zero-downtime deployments.
- Configured and maintained **AWS S3 buckets** across multiple environments for media storage, ensuring secure and scalable file management integrated with the mobile application.
- Integrated **Sanity** headless CMS to decouple content management from code releases, enabling non-engineering stakeholders to update app content without developer intervention.
- Implemented **Typesense** for fast, typo-tolerant search functionality, improving content discoverability within the app.
- Built an admin panel from scratch using **Rails Hotwire Stimulus**, enabling non-technical users to manage content independently and significantly reducing content update turnaround time.
- Implemented responsive UI using **TailwindCSS**; maintained a legacy **ReactJS/Azure** product, resolving performance bottlenecks and keeping the system production-stable.

Senior Software Engineer
Gurzu Inc

Jun 2019-Mar 2023
Lalitpur, Nepal

- Led and supervised** a team of software engineers, aligning objectives with project goals and ensuring on-time delivery by delegating tasks and monitoring milestones.
- Migrated CI/CD processes from CircleCI to GitHub Actions**, streamlining development workflows, reducing build times, and improving deployment reliability.
- Implemented **Storybook component** library to standardise reusable UI components and added infinite scrolling for enhanced user interaction.
- Directed frontend technical direction as Tribe Captain, establishing company-wide frontend standards and best practices.

Software Engineer
Gurzu Inc

Jun 2019-Mar 2023
Lalitpur, Nepal

- Managed cross-functional teams** in mobile application development, ensuring cohesive collaboration across engineering disciplines.
- Designed **RESTful API** endpoints for data manipulation and standardised payloads in close collaboration with the mobile team.
- Configured **AWS S3** buckets for image uploads across development, staging, and production environments.
- Implemented **API authentication** using **JSON Web Tokens (JWT)** and **Passport.js** for secure access control.
- Utilised **Redis** to cache user OTPs and restricted authentication tokens, improving authentication performance and security.
- Set up **Firebase Cloud Messaging** for targeted push notifications, improving user engagement.
- Executed CRUD operations on a **PostgreSQL** database supporting image file management at scale.
- Conducted **requirement analysis** and **project estimation** with the PM; managed bi-weekly client meetings to align expectations and deliverables.

Associate Software Engineer
Gurzu Inc

Jun 2019-Mar 2023
Lalitpur, Nepal

- Developed a **responsive video editor** supporting image and video formats, featuring a multimedia timeline and preview section, built with **CSS** and **ReactJS**.
- Facilitated team planning and tracking using the **SCRUM** agile framework, enhancing collaboration and progress monitoring.
- Worked with backend engineers to optimize API calls, eliminating redundant requests and improving application performance.

Software Engineer Intern
Trumark Private Limited

Oct 2018-Dec 2018
Kathmandu, Nepal

- Developed a web-based game using HTML, CSS, and vanilla JavaScript, gaining a strong foundation in core JS functionality.
- Implemented social authentication using React, Node.js, and RESTful API patterns.

EDUCATION

Lincoln University, **Master of Business Administration**
Tribhuvan University, **Bachelor of Science in Computer Science and Information Technology**

2022 - 2024
2014 - 2018

AWARDS AND EXTRACURRICULARS

Mentor, Gurzu Bootcamp
Provided mentoring on the frontend for the Bootcamp candidates and junior developers.

Tribe Captain, Gurzu
Collaborated with the developers in creating the company's standard frontend practices.
Directed the team to move forward with the activities that resulted in the growth and development of the front-end team.

Microsoft Student Partner
Participated in various technical and leadership workshops.
